

ST. PAUL'S CATHOLIC JUNIOR SCHOOL

Year 6 Curriculum Newsletter: Autumn Term 2022

To all our parents and carers,

We are delighted to share with you the content of the Year 6 curriculum for this term. We hope that this gives you a window into your child's learning and enables you to have conversations with your child about what is going on in school.

ENGLISH – reading

Our novel for the Autumn term in Year 6 is the deeply moving and Blue Peter book award winning 'Private Peaceful' by Michael Morpurgo. Set in World War I, a young man relates his experiences of life on the Front, capturing his memories as he looks back over his life.

In our reading comprehension sessions, the children also experience both fiction and non-fiction texts, based on a range of subjects relating to the whole curriculum. Phonics interventions will be taking place for children who require them.

Your child will be receiving a reading book to bring home. Please read with your child at least four times a week.

Further details about English homework will be sent out in a separate letter.

ENGLISH – writing

We base the teaching of our writing on the language and structure found in quality texts.

Traditional Tales

The children will create their own tales with a twist, based on the brilliant 'Hansel and Gretel', by Neil Gaiman.

Poetry

Linking with our history, we will look at war poetry and then compose our own poems, using Remembrance Day as our theme.

Non-chronological reports

Linking in with Science work on evolution, we will be writing a report based on Charles Darwin's 'Origin of Species'.

GRAMMAR:

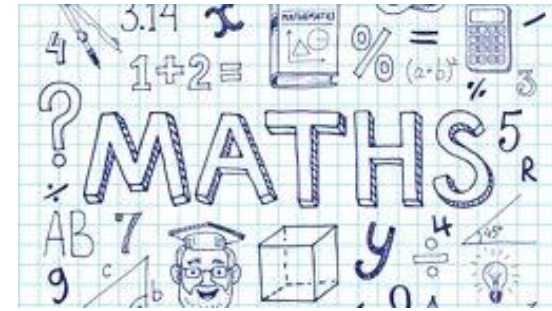

We will continue to build on and expand upon the children's knowledge of grammar, looking especially this term at:

- Proper, abstract and common nouns
- Determiners
- Inverted commas to punctuate speech
- Modal verbs
- Different sentence types
- Expanded noun phrases
- Apostrophes for contraction and possession
- Verb tenses

SPELLINGS:

Spelling lessons take place regularly in each class.

Spelling homework takes place on the Emile app. Logins will be sent home with your children.

This term we will cover the following topics:

- place value of 6 digit numbers
- addition
- subtraction
- multiplication
- division
- fractions.

For each topic, we work through the following sequence, encouraging the mastery approach in Maths which helps the children to apply their knowledge:

1. We practise the skill.
2. We link the skill to questions involving units of measure.
3. We complete missing box questions relating to the skill.
4. We answer reasoning questions based on the skill.
5. We problem solve, applying the skill we have learnt.

You can view our calculation policy on the school website, which may help you to understand how we teach Maths in school.

<https://www.spcj.co.uk/letters/> We will also complete weekly basic skills sessions, which help the children to practise core mathematical skills.

Details about Maths homework will be sent out in a separate letter.

RE

Here are our topics for this term:

Loving:

The children will think about how it is in the love of a family that Christians first experience the reality of Church. Everyone begins life in a home and family or community of some kind. They will consider how important it is that we love and care for people, whilst also looking at Scriptural passages that show us the everlasting and unconditional love of God.

Vocation and Commitment:

The children will consider how, through Baptism and Confirmation, all Christians are called to share the mission of Jesus. There are many different ways of carrying out that mission. For some people their mission or vocation is as a priest or member of a religious order. The children will explore different vocations that people may experience.

Expectations:

Christians celebrate the birth of Jesus, given by God as a sign and expression of God's love. Giving and receiving reflects the truth that all life is given by God and life is given meaning through the birth of Jesus. The children will reflect on how Advent is a time of joyful expectation, as we prepare to receive Jesus into our lives and to share this gift with others at Christmas and throughout the year.

The children will also explore the faith of **JUDAISM**. We will be looking at the feast of Rosh Hashanah, finding out why and how Jewish people celebrate this festival.

Daily acts of worship also take place within each class.

PSHE

Local and global communities

In this topic, the children will explore the Universal Rights of the Child and what it means to be a 'global citizen'. They will consider how important it is for people to feel welcome and valued in any society or community. They will discuss democracy and the importance of sharing our voices.

Respecting diverse identity

The children will think about the different perceptions that there are of the word 'normal'. They will consider how being 'different' affects people. They will also consider what leads people to use bullying behaviours.

The wonder of creating new life

We will explore how being made in the image and likeness of God informs decisions and actions when building relationships with others. We will also discuss how a human life is conceived.

This term, we will be:

1. Learning about **EVOLUTION AND INHERITANCE**. Building on their learning about adaptation from previous years, the children will explore the concepts of evolution and also how species inherit characteristics from their parents.
2. Learning about **LIGHT**. Building on our prior work in this area in Year 3, we will explore how light travels from light sources to our eyes. We will think about how the eye works to make us see. We will also further our understanding of the formation of shadows, relating this to the way in which light travels.

HISTORY

'How was West Derby shaped by WWI?'

This is a local history unit, in which the children will study the life of Lewis Mogridge, a real young man from West Derby who lived during the First World War. His name can be found on the war memorial in West Derby village, by St. Mary's Church. Children will explore his experiences through primary and secondary sources to gain a better understanding of life in World War I.

Black History Month (October) is also a focus in our school and, in both assemblies and lessons, children will be researching and learning about figures from black history who have contributed to our world and who have much to teach us about resilience and respect.

ART

'World War I soldier'

This term, the children will analyse the drawings and techniques of Paul Nash, a war artist. They will use their learning to help them create their own drawings of a World War I soldier.

GEOGRAPHY

'What will the world be like in the future?'

In this unit, the children will consider the past, present and future of their local area. This unit help them see change as positive and to feel optimistic about the changes that lie ahead. The children will create their own plan for the future of the local area, considering the needs of the wider community and thinking about housing, public services and industries whilst also contemplating the issue of sustainability.

DT

Food Technology

All children will be participating in classes with our expert teacher from School Improvement Liverpool, Miss Smith. They will continue their learning around the importance of a balanced diet, following recipes to make easily adaptable meals, such as chilli or bolognaise.

SPANISH

Our specialist Spanish teacher Estrella will be teaching the children how to talk about their families and the names of jobs. The children will also engage in discussions relating to real life situations.

“Nos gusta aprender español en St Paul’s.”

On September 27th, the school will be celebrating **European Languages Day**, with the children taking part in activities promoting the richness and diversity of the languages spoken in our continent.

MUSIC

‘When I grow up’

This is a musical theatre unit, looking particularly at the brilliant songs from ‘Matilda’. They will build on their existing skills of rhythm, pulse and pitch, also having the opportunity to compose their own music based on their learning.

COMPUTING

‘Crossy Roads’

The class will explore Virtual Reality (VR) and how it can be used in the classroom. The children will also build their own VR world.

PE

Dance, gymnastics, yoga and strength building

The children will develop their skills in all of the above areas. Our new PE scheme includes lessons that are easily adaptable for rainy days, meaning that not even bad weather or the hall being used can stop us taking part in high quality PE sessions!

We hope that you find this newsletter helpful. Further information on our curriculum and how we teach can be found on the school website. We will be adding further to this over the year.

Follow us on Twitter (@spcjliverpool) where we share the excellent learning that goes on at St. Paul’s.

If you have any questions about our curriculum, or any concerns, please do not hesitate to get in touch.

Many thanks,

The Year 6 teaching team:

Mr. Osborne, Mr. O’Callaghan, Mrs. Roberts and Mr. Fox-Ford
